

Draw the vertical and horizontal cross sections. The base side should always be facing DOWN.

| SHAPE | Cutting \perp to ground | | Cutting \parallel to ground | |
|--|--|------------|---|--|
| | VERTICAL | HORIZONTAL | | |
|  |  Circle | |  Circle | |
| RECTANGULAR PRISM  | <input type="checkbox"/> square or <input type="checkbox"/> rectangle (depends how it's oriented) | |  - rectangle or <input type="checkbox"/> - square | |
| TRIANGULAR PRISM  |  triangle | |  rectangle | |
| CYLINDER  |  rectangle | |  circle | |
| CONE  |  triangle | |  circle | |
| SQUARE PYRAMID  |  triangle | | <input type="checkbox"/> Square | |
| RECTANGULAR PYRAMID  |  triangle | |  rectangle | |

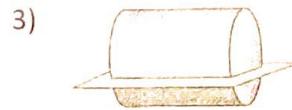

Directions: Name the cross section.

Directions: Sketch a drawing of the two-dimensional cross section of each 3-D figure. Then, find the area of the cross section.

9) Given: Cylinder

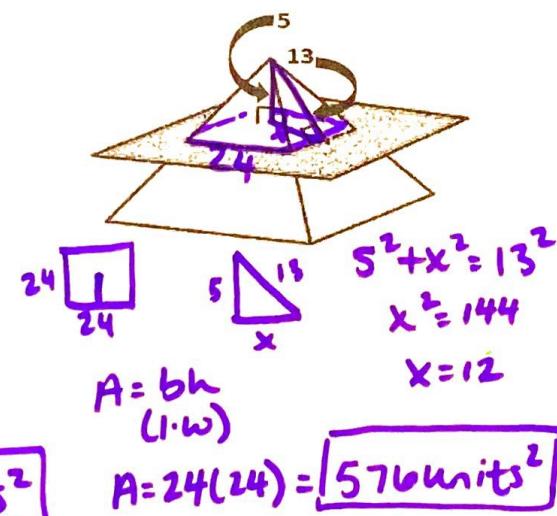

$$A = bh$$

$$(l \cdot w)$$

$$A = 8(18)$$

$$A = 144 \text{ units}^2$$

10) Given: Square Pyramid

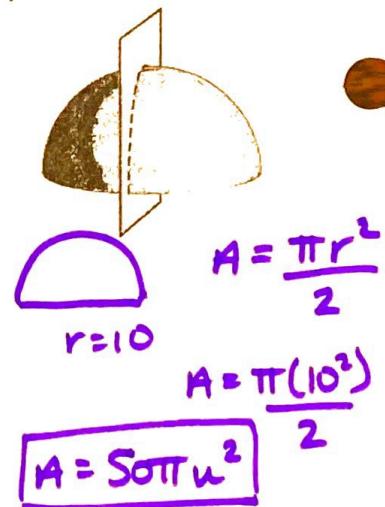

$$\frac{1}{2}bh$$

$$(l \cdot w)$$

$$A = 24(24) = 576 \text{ units}^2$$

11) Given: Radius of the Original Sphere = 10

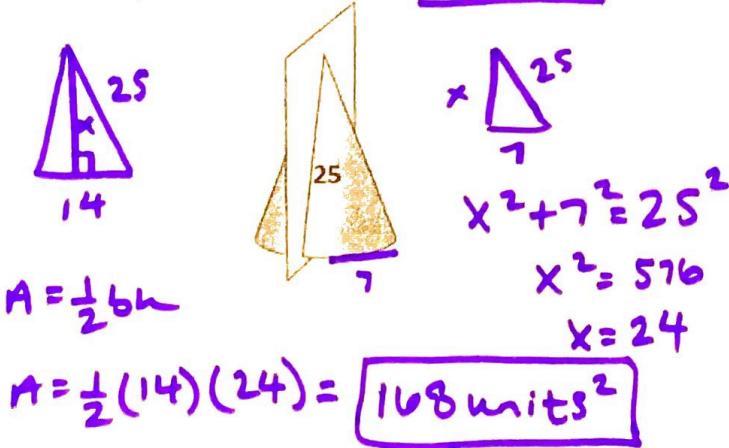

$$A = \frac{\pi r^2}{2}$$

$$A = \frac{\pi (10^2)}{2}$$

$$A = 50\pi \text{ units}^2$$

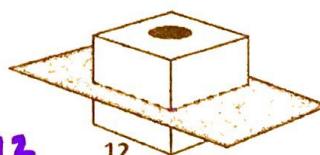

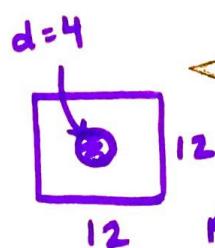

12) Given: Cone with a Base Radius of 7.

$$A = \frac{1}{2}bh$$

$$A = \frac{1}{2}(14)(24) = 168 \text{ units}^2$$

13) Given: A cube & the diameter of the circle is $\frac{1}{3}$ the size of the cube side length.

$$A = \pi r^2$$

$$A = \pi (2^2)$$

$$A = 4\pi$$

$$144 - 4\pi = 131.43 \text{ units}^2$$
